REPORTING FOR WEEK ENDING October 16, 2005 CROP YEAR

RELEASED: October 17, 3PM - There were 7 days suitable for field work. Soil moisture supplies were 25% very short, 40% short, 34% adequate, and 1% surplus.

CROPS: Dry conditions allowed producers to continue harvest of remaining crops. Rice harvest continues at a slower pace due to downed rice. A few reporters mentioned having some downed rice germinated. Apple harvest continued. Pecan groves being cleaned up in preparation for harvest. Hay producers made final cutting of warm season forages. Cool season forages need rain statewide. Armyworms reported in pastures and newly emerged wheat fields.

LIVESTOCK: Livestock were reported to be in fair condition. Culling cows and fall calves, and feeding hay reported due to dry conditions. Some cattle being sold due to shortage of pastures and hay. Fields drying out again. Fertilized cool season perennial forages, and planted cool season annual forages. Had problems with armyworms in some counties.
